Available for employment in Canada with a valid work permit.

Software Developer with 5 years of experience specializing in **JavaScript** and building responsive, user-centric applications using **React** and **React Native**. Proficient in **HTML**, **CSS**, and modern JavaScript frameworks, with a proven ability to deliver scalable, high-quality solutions on time and within budget. Strong collaborator, dedicated to creating seamless user experiences and efficient code across both frontend and backend projects.

Work Experience

Web Developer Globant, 2021– 2024

- Contributed to the upgrade of the applicant tracking system to a Next.js and Prisma platform, improving candidate experience and recruitment processes.
- Enhanced recruiter visibility and reduced candidate identification time by 20% with advanced filtering and search features.
- Designed user-friendly interfaces and notifications, aiming to improve onboarding by 20% and reduce missed payments by 10%.
- Built a React Native app for users to pay vendors using credit/debit cards, enhancing payment flexibility.
- Integrated ACH, wire transfer, and check payments, targeting a 15% reduction in transaction latency.
- Optimized app performance through profiling and debugging, resulting in a 20% reduction in load times.
- Designed user-friendly interfaces and notifications, aiming to improve onboarding by 20% and reduce missed payments by 10%.

Frontend Developer Euclidian, 2019-2021

- Developed and maintained web applications with Vue.js and React, focusing on performance and user experience, and implemented state management with Vuex and Redux.
- React Native app with React Navigation and Redux, collaborating with UX/UI designers to ensure a user-friendly interface.
- Conducted code reviews, enforced coding standards, and implemented unit testing strategies, reducing post-release issues by 15%.

Engineer Tepoli S.A. 2016-2019

- Configured and optimized Raspberry Pi systems for diverse applications, improving system performance by 20% and enhancing overall functionality.
- Designed and welded electronic circuits, achieving a 30% increase in circuit reliability and adhering to industry safety standards.

Mathematics Teacher KUMON, 2014-2016

- Developed and implemented individualized learning plans, improving student performance and comprehension in math and reading.
- Monitored and assessed student progress, providing tailored feedback and support that enhanced student achievement by 30%.

Education**Electronic Engineering**

La Salle University

2012-2017
